#### **About This Report**

# **About Your Engagement Indicators Report**

Engagement Indicators (EIs) provide a useful summary of the detailed information contained in your students' NSSE responses. By combining responses to related NSSE questions, each EI offers valuable information about a distinct aspect of student engagement. Ten indicators, based on three to eight survey questions each (a total of 47 survey questions), are organized into four broad themes as shown at right.

	Theme	Engagement Indicator
Academic Challenge		Higher-Order Learning Reflective & Integrative Learning
	,	Learning Strategies
		Quantitative Reasoning
	Learning with Peers	Collaborative Learning Discussions with Diverse Others
	Experiences with Faculty	Student-Faculty Interaction Effective Teaching Practices
	Campus Environment	Quality of Interactions Supportive Environment

#### **Report Sections**

Overview (p. 3)

Displays how average EI scores for your students compare with those of students at your comparison group institutions.

Theme Reports (pp. 4-13)

Detailed views of EI scores within the four themes for your students and those at comparison group institutions. Three views offer varied insights into your EI scores:

#### Mean Comparisons

Straightforward comparisons of average scores between your students and those at comparison group institutions, with tests of significance and effect sizes (see below).

#### **Score Distributions**

Box-and-whisker charts show the variation in scores within your institution and comparison groups.

#### Performance on Indicator Items

Responses to each item in a given EI are summarized for your institution and comparison groups.

Comparisons with High-Performing Institutions (p. 15) Comparisons of your students' average scores on each EI with those of students at institutions whose average scores were in the top 50% and top 10% of 2016 and 2017 participating institutions.

Detailed Statistics (pp. 16-19)

Detailed information about EI score means, distributions, and tests of statistical significance.

#### **Interpreting Comparisons**

Mean comparisons report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2015). Comparisons with an effect size of at least .3 in magnitude (before rounding) are highlighted in the Overview (p. 3).

Els vary more among students within an institution than between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how El scores vary among your students and those in your comparison groups. The Report Builder—Institution Version and your *Major Field Report* (both to be released in the fall) offer valuable perspectives on internal variation and help you investigate your students' engagement in depth.

#### **How Engagement Indicators are Computed**

Each EI is scored on a 60-point scale. To produce an indicator score, the response set for each item is converted to a 60-point scale (e.g., Never = 0; Sometimes = 20; Often = 40; Very often = 60), and the rescaled items are averaged. Thus a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

For more information on EIs and their psychometric properties, refer to the NSSE website: nsse.indiana.edu

Rocconi, L., & Gonyea, R. M. (2015, May). Contextualizing student engagement effect sizes: An empirical analysis. Paper presented at the Association for Institutional Research Annual Forum. Denver. CO.

#### Overview

# **University of North Carolina at Pembroke**

## **Engagement Indicators: Overview**

Engagement Indicators are summary measures based on sets of NSSE questions examining key dimensions of student engagement. The ten indicators are organized within four broad themes: Academic Challenge, Learning with Peers, Experiences with Faculty, and Campus Environment. The tables below compare average scores for your students with those in your comparison groups.

#### Use the following key:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- $\triangle$  Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.
- -- No significant difference.
- $\nabla$  Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Your students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

#### **Academic Challenge: First-year students**

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: *Higher-Order Learning, Reflective & Integrative Learning, Learning Strategies*, and *Quantitative Reasoning*. Below and on the next page are three views of your results alongside those of your comparison groups.

Mean Comparisons	UNC	Your first-year students compared with						
	Pembroke	Southea	ast Public Effect	Carneg	ie Class Effect	UNC	System Effect	
Engagement Indicator	Mean	Mean	size	Mean	size	Mean	size	
Higher-Order Learning	40.0	37.8 *	.17	37.8 *	.17	37.8 *	.17	
Reflective & Integrative Learning	35.3	34.6	.06	34.9	.03	35.3	.00	
Learning Strategies	40.2	38.7	.11	38.5	.13	38.6	.12	
Quantitative Reasoning	27.2	27.9	04	27.2	.00	28.0	05	

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; \*p < .05, \*\*p < .01, \*\*\*p < .001 (2-tailed).

#### **Score Distributions**

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

## **Academic Challenge**

# **University of North Carolina at Pembroke**

# **Academic Challenge: First-year students (continued)**

#### **Performance**<sup>a</sup> on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.

		Percentage poin	t difference between you	r FY students and
Higher-Order Learning	UNC Pembroke	Southeast Public	Carnegie Class	UNC System
Percentage responding "Very much" or "Quite a bit" about how much coursework emphasized	%			
4b. Applying facts, theories, or methods to practical problems or new situations	71	+0	+2	-2
4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts	74	+5	+5	+4
4d. Evaluating a point of view, decision, or information source	76	+8	+6	+7
4e. Forming a new idea or understanding from various pieces of information	71	+4	+2	+3
Reflective & Integrative Learning				
Percentage of students who responded that they "Very often" or "Often"				
2a. Combined ideas from different courses when completing assignments	49	<b>l</b> -0	-2	-2
2b. Connected your learning to societal problems or issues	51	+1	<u>-1</u>	-3
2c. Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments	57	+7	+6	+3
2d. Examined the strengths and weaknesses of your own views on a topic or issue	66	+3	+3	+1
Ze. Tried to better understand someone else's views by imagining how an issue looks from his or her perspective	67	-2	-2	-2
2f. Learned something that changed the way you understand an issue or concept	70	+6	+4	+4
2g. Connected ideas from your courses to your prior experiences and knowledge	74	-1	-2	-3
Learning Strategies				
Percentage of students who responded that they "Very often" or "Often"				
9a. Identified key information from reading assignments	80	+4	+2	+3
9b. Reviewed your notes after class	73	+6	+7	+7
9c. Summarized what you learned in class or from course materials	73	+9	+10	+9
Quantitative Reasoning				
Percentage of students who responded that they "Very often" or "Often"				
Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.)	50	-3	-1	-5
6b. Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.)	41	+2	+2	+2
6c. Evaluated what others have concluded from numerical information	38	-1	+1	-0

a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

## **Experiences with Faculty**

# **University of North Carolina at Pembroke**

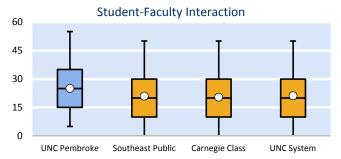

#### **Experiences with Faculty: First-year students**

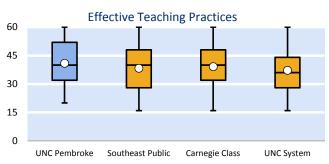

Students learn firsthand how experts think about and solve problems by interacting with faculty members inside and outside of instructional settings. As a result, faculty become role models, mentors, and guides for lifelong learning. In addition, effective teaching requires that faculty deliver course material and provide feedback in student-centered ways. Two Engagement Indicators investigate this theme: *Student-Faculty Interaction* and *Effective Teaching Practices*. Below are three views of your results alongside those of your comparison groups.

Mean Comparisons	UNC	Your first-year students compared with								
Engagement Indicator	Pembroke	Southeast Public	Carnegie Class	UNC System						
	Mean	Effect Mean size	Effect Mean size	Effect Mean size						
Student-Faculty Interaction	25.0	21.0 *** .27	20.4 *** .32	21.2 *** .27						
Effective Teaching Practices	40.8	38.3 ** .19	39.1 .13	37.1 *** .29						

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; \*p < .05, \*\*p < .01, \*\*\*p < .01 (2-tailed).

		Percentage point difference between your FY students						
Quality of Interactions	UNC Pembroke	Southeast Public	Carnegie Class	UNC System				
Percentage rating their interactions a 6 or 7 (on a scale from 1="Poor" to 7="Excellent") with	%							
13a. Students	37	-13	-14	-14				
13b. Academic advisors	40	-10	-10	-8				
13c. Faculty	47	-0	-3	+3				
13d. Student services staff (career services, student activities, housing, etc.)	39	-5	-6	-4				
13e. Other administrative staff and offices (registrar, financial aid, etc.)	37	-3	-7	-1				
Supportive Environment								
Percentage responding "Very much" or "Quite a bit" about how much the institution emphasized								
14b. Providing support to help students succeed academically	70	-6	-5	-8				
14c. Using learning support services (tutoring services, writing center, etc.)	75	-2	-1	-3				
14d. Encouraging contact among students from diff. backgrounds (soc., racial/eth., relig., etc.)	66	+4	+5	+1				
14e. Providing opportunities to be involved socially	77	+5	+8	+2				
14f. Providing support for your overall well-being (recreation, health care, counseling, etc.)	72	-0	+4	-4				
14g. Helping you manage your non-academic responsibilities (work, family, etc.)	48	+5	+5	+7				
14h. Attending campus activities and events (performing arts, athletic events, etc.)	77	+7	+16	+5				
14i. Attending events that address important social, economic, or political issues	66	+14	+16	+11				

a. Percentage point difference = Institution percentage - Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

## **Campus Environment**

# **University of North Carolina at Pembroke**

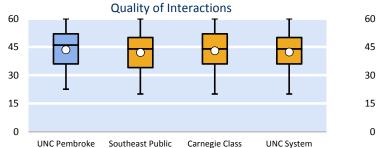

## **Campus Environment: Seniors**

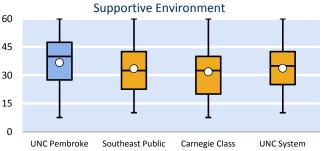

Students benefit and are more satisfied in supportive settings that cultivate positive relationships among students, faculty, and staff. Two Engagement Indicators investigate this theme: *Quality of Interactions* and *Supportive Environment*. Below are three views of your results alongside those of your comparison groups.

Mean Comparisons	UNC	Your seniors compared with									
	Pembroke	Southea	st Public Effect	Carnegi	e Class Effect	UNC S	ystem Effect				
Engagement Indicator	Mean	Mean	size	Mean	size	Mean	size				
Quality of Interactions	43.5	42.1	.12	43.0	.04	42.3	.10				
Supportive Environment	36.7	33.5 **	.23	31.8 ***	.34	33.7 **	.22				

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; \*p < .05, \*\*p < .01, \*\*\*p < .001 (2-tailed).

#### **Score Distributions**

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

#### **Performance**<sup>a</sup> on Indicator Items

The table below displays how your students responded to each EI item, and the difference, in percentage points, between your students and those of your comparison group. Blue bars indicate how much higher your institution's percentage is from that of the comparison group. Dark red bars indicate how much lower your institution's percentage is from that of the comparison group.

# Comparisons with High-Performing Institutions University of North Carolina at Pembroke

## Comparisons with Top 50% and Top 10% Institutions

While NSSE's policy is not to rank institutions (see nsse.indiana.edu/html/position\_policies.cfm), the results below are designed to compare the engagement of your students with those attending two groups of institutions identified by NSSE<sup>a</sup> for their high average levels of student engagement:

- (a) institutions with average scores placing them in the top 50% of all 2016 and 2017 NSSE institutions, and
- (b) institutions with average scores placing them in the top 10% of all 2016 and 2017 NSSE institutions.

While the average scores for most institutions are below the mean for the top 50% or top 10%, your institution may show areas of distinction where your average student was as engaged as (or even more engaged than) the typical student at high-performing institutions. A check mark ( $\checkmark$ ) signifies those comparisons where your average score was at least comparable to that of the high-performing group. However, the presence of a check mark does not necessarily mean that your institution was a member of that group.

It should be noted that most of the variability in student engagement is within, not between, institutions. Even "high-performing" institutions have students with engagement levels below the average for all institutions.

a. Precision-weighted means (produced by Hierarchical Linear Modeling) were used to determine the top 50% and top 10% institutions for each Engagement Indicator from all NSSE 2016 and 2017 institutions, separately by class. Using this method, Engagement Indicator scores of institutions with relatively large standard errors were adjusted toward the mean of all students, while those with smaller standard errors received smaller corrections. As a result, schools with less stable data—even those with high average scores—may not be among the top scorers. NSSE does not publish the names of the top 50% and top 10% institutions because of our commitment not to release institutional results and our policy against ranking institutions.

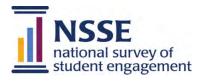

b. Check marks are assigned to comparisons that are either significant and positive, or non-significant with an effect size > -.10.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean  $\pm$ 1.96 x SEM) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

 $a. \ Results \ weighted \ by \ institution-reported \ sex \ and \ enrollment \ status \ (and \ institutional \ size \ for \ comparison \ groups).$ 

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean  $\pm$ 1.96 x SEM) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.
