✿ Cool Green Jobs ✿

Ecotourism offers jobs for those with a sense of adventure. Some of these positions include: site educators, camp counselors, adventure travel agents and tour guides.

Organic Farming is for the folks who are tired of chemically sprayed fruits and vegetables and decide to do something about it. Organic farming, urban farming outreach programs and even locally grown food specialist are positions in demand.

Bike and Scooter Technician. More two-wheeled vehicles have hit the streets in the past couple years. This has spiked an expected growth in maintenance, after market parts and even roadside assistance crews.

Protection Technician. A love of nature and desire to work outside of a lab can contribute to a great fit in this field; with tasks like: collecting water and soil samples, responding to hazardous spills, investigating plant disease and study abroad opportunities to collect field data.

Alternative Energy requires and interest in working with hands and emerging technology. Task can include: updating heating and cooling systems, building with solar panels, and working with builders and consumers to select products for upgrades.
